

This image shows a full-page view of a sheet of graph paper. At the very top, there is a horizontal color calibration bar containing numerous small squares in different colors (black, white, grays, reds, yellows, greens, blues, purples) along with some numerical data. Below this bar, the page is filled with a uniform grid of small squares. On the far left side, there is a vertical ruler or scale, likely used for measuring the height of rows or columns. The grid itself is composed of thin, light-colored lines forming a continuous pattern across the entire page.
